## **GENERAL DESCRIPTION**

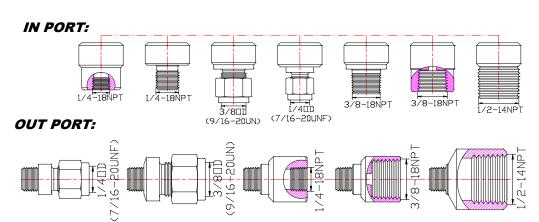

The model MV9466000H is a 2-Way, Two position Normally closed, Spring/Poppet operated relief valve, used to control or limit the pressure in a system, capable of pressure from 3,000psi to 6,000psi.

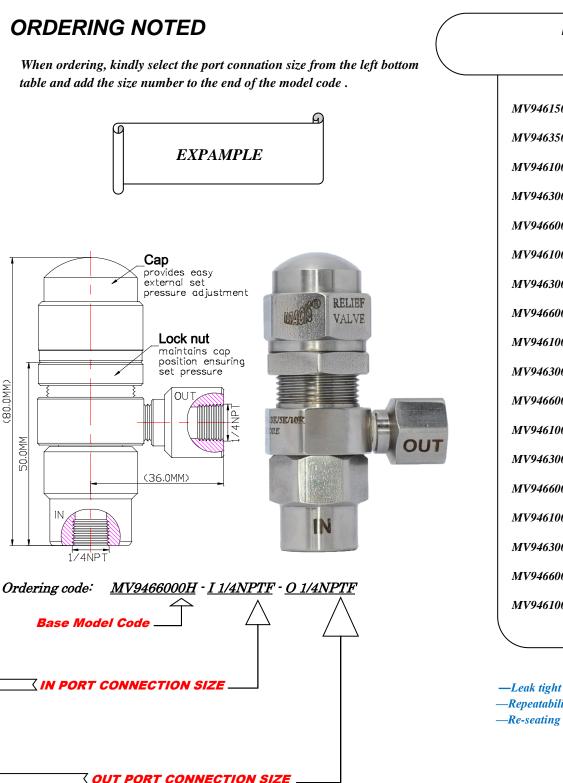

The pressure media enters the relief valve, turning the spring housing clockwise will increase the relief valve pressure setting. Rotating the spring housing counterclockwise will decrease the relief valve pressure setting. When the set pressure is exceeded, the valve is forced open. They have excellent pressure relief and reset repeatability.
