VELOCITY CHECK VALVE

Valve Operation

Velocity Manual Check Valve (MV1586780H-A) is a 2-Way control valve, it is to provide positive flow shut off in the event of an abnormal flow thru pressure differential.

To open the valve, push down the manual lever until the pressure equalizes on both sides and allow the spool to stay at the in position, as status table on state 2.

Releasing the manual lever, the valve will still stay at in position unless the manual lever is manually pull to allow the valve and ball check to it position ,the pressure flow from OUT port to IN port, pressure loss in the downstream of the OUT port will causes the valve to trip as status table on state 1.

Flow Control Status Table

STATE	IN	OUT	MANUAL LEVER
1	-	O	Pull
2	O	O	Push Down

Ordering Ref : MV1586780H-A-3/8

Ordering Ref : MV1586780H-A-1/2

Specification

Control Application	2-Way Normally Closed Velocity Check Valve with Manual Lever Type
Exterior Shape	Circular Ø44.00 mm (1 ⁴⁷ / ₆₄ ")
Net Weight	1.2 kg
Working Media	Oil
Max Working Pressure	10,000 PSI (689.4bar)
Operating Pressure (Manual Lever)	0-10,000PSI(0-689.4bar)
Temperature Range	- 30°C to 120°C <i>Other Temperature Ranges available. Consult Factory</i>
Material(Valve Body)	316 L
Seal Material	Nitrile Rubber(NBR) <i>Other Seal Material are Available Upon Request</i>
Material (Palm Button)	Polyamide <i>Other Material are Available Upon Request</i>
Flow Rate	Cv = 0.35

Distinctions

Ordering Ref No : MV 1586780H-A-3/8

Port Connection Size: IN Port : 3/8"NPT M , OUT Port : 1/4" NPT F

Ordering Ref No : MV 1586780H-A-1/2

Port Connection Size : IN Port : 1/2" NPT M , OUT Port : 1/4" NPT F

** Measurement stated are with tolerance of +/-10%. Optional Parts/Material are available upon request.
